WHO AM I

I am a student started to pursue my bachelor of technology in Computer science Engineering (Cyber Security). I have knowledge regarding Web development in front end designing using HTML, CSS and JavaScript. Python is my first programming language. I love technology and innovations so I love to read books regarding technology which made me a tech geek where I am able to speak about any kind of technical stuff with little preparation. I am also aware of the designing. I am learned Auto cad designer, Working with Photoshop for all kinds of editing made me some more strong in designing or editing the things. MS word, MS power point, MS Excel are the applications which are known for me in the field of data and its presentation.
A part of this I am aware of Digital marketing, Affiliate Marketing SEO (Search Engine Opimisation), Blogging and Content Writing

Skill Highlights

- Project management
- Strong decision maker
- Complex problem solver
- leadership
- Creative designing
- Innovative
- Service-focused
- Good communication
